# This is L. Brador.

Behind all our clothes and products lies a very clear concept. That they should make your working day safer, more comfortable and more functional, and we believe that high quality, good design and smart functions always go hand in hand. In this workbook we've collected all our new items for this year. Here are a few of our favourites.

# ATTENTION!

## STAY SAFE AT WORK

Our working day is defined by your working day, and all our products are designed entirely on the basis of your work, your movements and your needs. Naturally, a lot of this work centres on comfort, smart functions and choosing the right material. But if we were to choose one single factor as the most important, the choice is simple. Safety, of course. We want you to feel safe and secure in your work, and assured in the knowledge that the risk of accidents is minimised. That's why we manufacture Hi-Vis garments of the highest quality and why, for the same reason, we have now overhauled our range and made it easier than ever to find the right products for you and your colleagues.

Hi-Vis by L.Brador

# CAN WE HAVE YOUR ATTENTION, PLEASE?

“If you can't be seen, then you're not there,” they say. We wouldn't go that far but, on the hand, we know the following to be true: “You can only be seen if you make yourself visible”. It's as simple as that. No matter what industry you work in or what your working day is like, you are safer when others can see you more easily.

Different environments involve different degrees of risk, and so we – and the rest of the industry – categorise our Hi-Vis clothing into three different classes. This makes it easier to choose, and easier to know exactly what garment you need.

We develop and design all of our Hi-Vis clothing with the same eye for detail and quality as other products and, for us, it goes without saying that they should be just as stylish, have the same good fit and the same smart functions as garments that are not Hi-Vis. That they will be equally comfortable is something you can also take for granted. Therefore, the majority of our Hi-Vis garments have details made with stretch reflective material details from 3M - easily the best reflective material in the market. With L.Brador Hi-Vis, you can also be assured of long-lasting garments and reflective details that you can trust to make you visible – from a long distance, and for a long time.

## 430P

**PROPERTIES AND USER BENEFITS**

- Warm-lined.
- The weave structure ensures a strong garment.
- Wind and waterproof with good breathability and taped seams.
- Body-hugging fit.
- Extended in the back to keep the lower back warm.
- Triple front placket protects the zip against wear and tear, gives good wind protection and, moreover, protects against water penetration.
- Covered zips to prevent water penetration.
- Adjustable at the waist hem for best fit.
- Adjustable and detachable hood.

**MATERIAL AND WEIGHT:**

100% polyester. 210 g/m<sup>2</sup>. 3M-reflective material.

**CERTIFIED IN COMPLIANCE WITH:**

EN 20471, class 3, EN 342.

**SIZE**

XS-5XL

## Make long days easier.

A longer jacket for those who work in really cold and windy environments, and who want outerwear that can handle really a rough day of work. This model also meets the very high requirements stipulated in the EN standard regarding visibility and Hi-Vis clothing. The jacket is designed according to the same principle as the rest of our Hi-Vis collection: with design, details and fabrics of premium quality – and which protect against wind, cold and rain.

L.BRADOR 430P / 189P

## 210P

**PROPERTIES AND USER BENEFITS**

- Winter-lined.
- The weave structure ensures a strong garment.
- Wind and waterproof with taped seams and good breathability.
- Double front placket protects the zip against wear and gives good wind and water protection.
- Adjustable waist for best fit and for shutting out the cold.
- Knitted inner cuff with thumb grip at the end.

**MATERIAL AND WEIGHT:**

100% polyester. 3M reflectors.

**CERTIFIED IN COMPLIANCE WITH:**

EN 20471, class 3, EN 342.

**SIZE**

**REFLECTIVE  
PARTNER: 3M**

## Short is wonderful.

This jacket has been designed and developed with our users' needs and wishes in mind. Carefully selected features from our popular models. The best of both worlds. And using our popular jackets 206P and 430P as the starting points, we have – in our eyes – created the optimal mix of these two. The result is a warm and truly durable jacket that protects you against both wind and cold – and that ensures good visibility in even the most miserable weather conditions.

# 117PB

## PROPERTIES AND USER BENEFITS

- Water and dirt-repellent.
- The weave structure ensures a strong garment.
- Stretch material in the front and front and rear sections of the knee for extremely good movability, comfort and ventilation.
- Using stretch material and a narrower fit gives a more body-hugging trouser with knee-pads that stay put.
- Pre-shaped knees for a better fit and flexibility.
- Reinforced knee-pad pockets in stretch Kevlar provide both good movability and durability.
- Extensible by 5 cm.
- Reinforced hanging pockets.
- Matches the structure and colour of jacket 425PB, 203PB and 204PB.
- The reflective panels are pliable, and give a degree of stretch with good breathability as well as greater durability as they stand up better against wear and tear in the wash.

## Faster and more versatile throughout the working day.

These trousers have been produced for those who frequently move around really quickly at work, often at around a hundred kilometers per hour. With truck and excavator drivers and other machine operators in mind, visibility is kept in focus. The trousers are made of a thin, cool, lightweight and flexible material suited for work in service sectors and for those of you who drive for a living.

# 185PB

**PROPERTIES AND USER BENEFITS**

- A strong half-Panama weave in polyester/cotton to give the best durability.
- Stretch material over the seat, front and crotch as well as the front and rear sections of the knee for extremely good movability, comfort and ventilation.
- Using stretch material and a narrower fit gives a more body-hugging trouser with knee-pads that stay put.
- 7 mm kneepads included in the trouser for cushioning and comfort.
- Ventilation on the inside is regulated by a zip to keep the user cool.
- Pre-shaped knees for a better fit and flexibility.
- Reinforced knee-pad pockets in stretch Kevlar provide both good movability and durability.

CLASS 1

## Be seen, be safe.

With the aim of improving the working environment for today's professional drivers, these trousers were developed in close concert with the industry. A journey which resulted in, among other things, a strong half-Panama weave in polyester/cotton, 7 millimetres of cushioning on the knees and adjustable ventilation on the inner thigh for truly great comfort. What's more, the reinforced knee-pad pockets in stretch Kevlar provide both good movability and extreme durability.

## 160PB

### PROPERTIES AND USER BENEFITS

- Water and dirt-repellent.
- Strong garment due to weave structure.
- Reinforced knees and thighs for better durability and to minimise the risk of flashing when manoeuvring machinery and vehicles.
- Matches structure and colour of jacket 203PB and winter jacket 203PB, 425PB and winter jacket 204PB.

# WORKMOVE™

Different professions and work scenarios require different trousers. That's why we've divided our stretch work trousers into three ranges: Max, Medium and Light. They're all designed to follow the body's natural movements, and to suit different types of work and work environment.

To achieve this, we work with the best materials on the market, Cordura stretch, Kevlar stretch and Dyneema. All to give you as a user extreme comfort, movability and durability.

No matter which range of stretch trousers you choose, you can be sure they'll make you feel more comfortable at work.

On the following two spreads we'll guide you to the right trousers for your working day.

**CORDURA**  
F A B R I C

**Kevlar.**

 **Dyneema®**

# WORKMOVE™ MAX

Maximised stretch zones with extreme durability and flexibility characterise our WorkMove™ Max trousers. 4-way stretch Cordura front and rear, in the crotch and on the calves provides maximum movability.

Knee-pad pockets with 4-way stretch Kevlar for extra durability.

What's more, we have our new full stretch trouser 1050PB with knee-pad pockets in Dyneema material.

# STRETCH YOUR LIMITS

1050PB MOMENTUM

30

Try  
something  
new.

The 1050PB Momentum stretch trousers are a completely new and exceptionally flexible model of work trousers, combining maximum flexibility with extreme durability, and here nothing has been left to chance. The main material used in the design of the trousers is Cordura and the knee pockets are made from the extremely durable stretch material Dyneema. The adjustable waistband and the trousers' articulated knees also give the trousers a slimmer fit, which contributes to the exceptionally high level of flexibility.

# 1050PB MOMENTUM

## PROPERTIES AND USER BENEFITS

- Full stretch trousers in 4-way stretch Cordura for extremely good movability, comfort and ventilation.
- Adjustable waistband in non-stretch material for the best fit.
- Nail pockets, leg pockets and rule pocket in non-stretch material.
- Stretch material and a narrower cut for a trouser with a closer fit and optimum comfort.
- Pre-shaped knees for a better fit and flexibility.
- Reinforced knee-pad pockets in Dyneema (4-way stretch).
- Nail pockets with zipped compartment for screw bits, for example.
- Zipped leg pocket for improved safety.
- Angled mobile phone pocket with magnetic clasp to keep your phone in place.
- Extendible by 5 cm.

## MATERIAL AND WEIGHT:

88% polyamide, 12% elastane, 275 g/m<sup>2</sup>

## SIZE

44-60, D84-D104

## The king of trousers.

1050PB Momentum is made completely from stretch material and could be described as the king of trousers.

Here we combine maximum movability with extreme durability. The trousers are light and flexible, developed in close collaboration with our users – and based on high standards of comfort and quality.

L.BRADOR 1052PB / 9001P / 5140A / 767

**WORKMOVE™**  
**MAX**

# 1052PB

## PROPERTIES AND USER BENEFITS

- Stretch material over the seat, front and crotch, as well as the front and rear sections of the knee for extremely good movability, comfort and ventilation.
- The use of stretch material and a narrower fit gives a more body-hugging trouser with knee-pads that stay put.
- Reinforced knee-pad pockets in stretch Kevlar provide both good movability and durability.
- Pre-shaped knees for a better fit and flexibility.
- Reinforced hanging pockets with increased volume.
- Ventilation on the inside thigh which is controlled with the aid of a zip, internally lined with mesh fabric to keep the user cool.
- On the left leg pocket there is a correctly angled phone pocket with a magnetic lock to keep the phone protected and in place.
- A strong half-Panama weave in polyester/cotton to give the best durability.
- Extendible by 5 cm.

## MATERIAL AND WEIGHT:

65% polyester, 35% cotton. 325 g/m<sup>2</sup>.

## SIZE

44-60, D84-D120

## Premium trouser model.

The fact that 1052PB is our absolute pride and joy when it comes to trousers cannot be emphasised enough. Each detail has been thoroughly made - each function, each seam. Everything in the right place and made with the right quality. Produced and developed in close collaboration with people who work in them every day. Try for yourself - we're sure you'll like them.

## WORKMOVE™

# ONE MORE FAMILY IS HAPPY TO SET THE STAGE

The night before the gates of Summerburst Gothenburg open for its 30,000 visitors, we meet One More Family at a sun-drenched Ullevi. For five days, Anders Claesson, together with his colleagues, has made sure that signs, entrances, lighting, lounges and restaurants follow the theme of the festival – and give the evening just the right setting.

One More Family's own journey started at a warehouse in Borås just over two years ago. At this warehouse, Anders, Fredrik, Kristoffer and Tobias had worked together, building up a unique combination of extensive experience from arranging events, construction projects and logistics. The result was the company One More Family and today they manage logistics and events for numerous major brands such as RayBan, Oakley, RedBull, Live Nation and Heineken. In an unusually brief period of time, they have created a name in the industry. And with that, the big assignments fall into place. The same weekend as the Summerburst festival takes place, they also arrange construction activities for the Sweden Rock festival, a booth construction for a trade fair on behalf of Oakley and GoPro in Norway, and an event for RedBull at a football tournament at Heden in Gothenburg.

“The important thing about being able to run projects at this level and with this intensity is to work with people and with equipment that is of the highest quality,” says Anders, who is today the company's CEO.

For the past year, L.Brador has been One More Family's supplier of Workmove trousers and upper wear.

“It is important for us to be able to be flexible in the way we dress, when our activities can change so rapidly between work indoors and outdoors. And given the Scandinavian climate, the weather can turn at any moment.

No matter what time of day, or what weather we are exposed to, we need to be ready by the time visitors arrive. Working in clothes that cope with the stress we expose them to and that, at the same time, give us the comfort to do that little bit extra is incredibly important,” continues Anders.

The sun slowly begins to descend down towards the western horizon, yet Anders and his colleagues have a few hours of work left before the area is completed and ready to receive the festival visitors.

**WORKMOVE**<sup>TM</sup>  
MEDIUM

# 1042PB

## PROPERTIES AND USER BENEFITS

- A strong half-Panama weave in cotton/ polyester to give the best durability.
- Stretch fabric at the front, across the knees, the back of the knees and over the entirety of the calf for good mobility, comfort and airflow.
- Using stretch material and a narrower fit gives a more body-hugging trouser with knee-pads that stay put.
- Pre-shaped knees for a better fit and flexibility.
- Reinforced knee-pad pockets in stretch Kevlar provide both good movability and durability.
- A somewhat narrower lower leg hem to help keep the trousers in position.
- Extendible by 5 cm.
- A refined fit, shape and waist combine to make a trouser that sits where it should even during extended periods of work whilst kneeling.
- Reinforced hanging pockets with increased volume.
- Ventilation on the inside thigh which is controlled with the aid of a zip, internally lined with mesh fabric to keep the user cool.

## MATERIAL AND WEIGHT:

65% polyester, 35% cotton. 325 g/m<sup>2</sup>.

## SIZE

44-60, D88-D120

## A trouser to feel good in.

Using 1052PB as a prototype, this trouser has been developed in a somewhat simpler design, but without compromising quality or fit. The stretch material has been used somewhat more sparingly and the rear pockets are of a traditional, exterior model.

## A series in 0502-Y.

Tradition and practicality dictate that painters and brickworkers wear white. However, not so much has been said about fit and flexibility, which is a little strange considering both professions need room for movement.

Our series of painter trousers - full-length, three-quarter-length and shorts in the same model - therefore feature generous stretch panels and a thin main material, making them light, cool and flexible.

# ADJUSTABLE LEG LENGTH ON ALL TROUSERS

You've not missed that the legs of all our trousers can be extended by a full 5 centimetres at the hem? That's right, so that our trousers fit everyone they have an adjustable leg length, and all you need to do to lengthen them is to unpick the seam and turn down the hem.

To help ensure you get a neat result, we offer this invaluable tool:

# DON'T SCRATCH THE PAINT.

Things move fast at Börjessons Bil in Alingsås. Cars are serviced, engine parts are replaced and wheels are balanced. The premises are bright, clean and airy, and as of six months ago everyone who works on the cars wears work trousers from L.Brador's No-Scratch range.

Gunnar Burman moves comfortably around one of the cars, busy repairing the rear lights.

"Switching to stretch trousers without visible metal detailing means that you no longer have to worry about scratching painted surfaces. Now we can move around more freely, and there's no risk when leaning on or moving against the car," says Gunnar.

Read the full story from Börjessons Bil at [lbrador.com](http://lbrador.com)

## WORKING BEHIND THE SCENES.

The NO-SCRATCH range gathers all our trousers with concealed metal detailing. And just as the name implies, they have absolutely no detailing which can scratch or scrape sensitive and delicate surfaces, such as cars, technical equipment and freshly painted kitchen cabinets. They're certainly useful in many different areas, and from our website you can download a catalogue full of tips and products for scenarios where you want to avoid scratching things.

# STAY ACTIVE. STAY WARM.

52

Being properly clothed for your working day is at least as important as having the right tools and equipment. And the most crucial roles are played by the garments that you have closest to your body: your socks and your underwear. These hidden clothing heroes seldom get much attention, but in fact they are almost essential to the way your day ends up.

Your underwear and your socks have a couple of truly important tasks. They have to keep you optimally warm, and also to transport moisture away from the skin.

We offer several variants that all fulfil those exact purposes – but they are all ideal for just the right temperature and work. To make it easier for you to choose, we have divided our socks and underwear into four categories, or levels if you prefer.

All models and variants feature the same high quality and carefully selected materials, but with varying degrees of warmth and wicking - from cool with a high level of wicking, to really warm and comfortable, with a lesser degree of wicking.

The model you choose depends on the type of work you do, your own temperature, the season, how much you move about and whether you're working indoors or outdoors.

# NEW ARRIVALS

Here we've gathered this season's new arrivals for your working day. Important products which have one essential thing in common: they make your day easier by offering a good fit, smart functions and a focus on details both large and small.

---

## 906P HI-VIS

### PROPERTIES AND USER BENEFITS

- Wind and waterproof with good breathability properties and taped seams.
- A three-layer fabric, with the outer shell, membrane and lining laminated together.
- Close fit.
- Extended back to keep the hollow of the back warm.
- Easy access to the trousers' front pockets.
- Front placket which provides good protection against wind and reduces wear on the zip.
- The jacket has an adjustable hood, as well as an adjustable hem and cuffs.

### MATERIAL AND WEIGHT:

100% polyester, 200 g/m<sup>2</sup>

### CERTIFIED IN COMPLIANCE WITH:

## 1050PB MOMENTUM

### PROPERTIES AND USER BENEFITS

- Full stretch trousers in 4-way stretch Cordura for extremely good movability, comfort and ventilation.
- Adjustable waistband in non-stretch material for the best fit.
- Nail pockets, leg pockets and rule pocket in non-stretch material.
- Stretch material and a narrower cut for a trouser with a closer fit and optimum comfort.
- Pre-shaped knees for a better fit and flexibility.
- Reinforced knee-pad pockets in Dyneema (4-way stretch).
- Nail pockets with zipped compartment for screw bits, for example.
- Zipped leg pocket for improved safety.
- Angled mobile phone pocket with magnetic clasp to keep your phone in place.
- Extendible by 5 cm.

### MATERIAL AND WEIGHT:

88% polyamide, 12% elastane, 275 g/m<sup>2</sup>

### SIZE

44-60, D84-D104

## 1052PB

### PROPERTIES AND USER BENEFITS

- Stretch material over the seat, front and crotch, as well as the front and rear sections of the knee for extremely good movability, comfort and ventilation.
- The use of stretch material and a narrower fit gives a more body-hugging trouser with knee-pads that stay put.
- Reinforced knee-pad pockets in stretch Kevlar provide both good movability and durability.
- Pre-shaped knees for a better fit and flexibility.
- Reinforced hanging pockets with increased volume.
- Ventilation on the inside thigh which is controlled with the aid of a zip, internally lined with mesh fabric to keep the user cool.
- On the left leg pocket there is a correctly angled phone pocket with a magnetic lock to keep the phone protected and in place.
- A strong half-Panama weave in polyester/cotton to give the best durability.
- Extendible by 5 cm.

### MATERIAL AND WEIGHT:

65% polyester, 35% cotton. 325 g/m<sup>2</sup>.

### SIZE

44-60, D84-D120

## 1042PB

### PROPERTIES AND USER BENEFITS

- A strong half-Panama weave in cotton/polyester to give the best durability.
- Stretch fabric at the front, across the knees, the back of the knees and over the entirety of the calf for good mobility, comfort and airflow.
- Using stretch material and a narrower fit gives a more body-hugging trouser with knee-pads that stay put.
- Pre-shaped knees for a better fit and flexibility.
- Reinforced knee-pad pockets in stretch Kevlar provide both good movability and durability.
- A somewhat narrower lower leg hem to help keep the trousers in position.
- Extendible by 5 cm.
- A refined fit, shape and waist combine to make a trouser that sits where it should even during extended periods of work whilst kneeling.
- Reinforced hanging pockets with increased volume.
- Ventilation on the inside thigh which is controlled with the aid of a zip, internally lined with mesh fabric to keep the user cool.

### MATERIAL AND WEIGHT:

65% polyester, 35% cotton. 325 g/m<sup>2</sup>.
